To Whom it May Concern:

It is my pleasure to write this letter of recommendation for Albert Barry.

Albert is an accomplished young man who always brings a lot of energy and enthusiasm to any project he works on. He is a fast learner and loves grappling with new concepts, techniques or ways of doing things.

In our time working together Albert was first put in charge of developing a kinetic motion system for multi-limbed crab like robots which existed in the Strained Metaverse video game. These crab creatures would adjust dynamically to 3D terrain giving them a very lifelike appeal. Albert was also charged with designing various levels and stages for the game, all of which had a high degree of aesthetic unity and were completed in a timely manner.

I have no doubt Albert will rise to any occasion or challenge put in front of him.

Kind Regards,
Dominic Obojkovits
